A LONG TIME AGO

企业历史文化—在很久以前

History

The wood industry evolved in Barlinek already in the 19th century. Until the end of the World War II a sawmill, a carpentry shop and a furniture manufacture operated. There were also other sawmills that after the War merged into one company: the Wood Company of the National Forest Holding „The State Forest” in Barlinek. At the beginning the sawmills processed coniferous and deciduous timber. Wood processing capacity reached around 100 m³ per day.

At the time, the carpentry shop produced furniture for schools and institutions, as well as anti-snow fences and land cirs. From 1947 production increased and expanded by the following articles: chairs, carpentry and wooden haberdashery.

From the 1st of January 1959 the company took the name of the Factory of the Wood Industry in Barlinek.

On the 1st of June 1999 the voivode of the West Pomeranian voivodeship decided that the state company Factory of the Wood Industry in Barlinek should be privatised.

Thanks to a considerable financial support, consistent policy of modernisation and expansion, increase in production of Barlinek flooring could be observed. Soon it became the synonym of an engineered flooring in Poland and other countries in the world.

发展历程

19世纪初，木业在宝林纳地区崛起；二战期间，小型锯木厂，木匠商铺和家具制造厂开始运营；二战后期，多个锯木厂开始合并，最终在宝林纳地区成立了“国家森林控股的木材公司”。最开始，这些锯木厂以针叶木材加工为主，每日木材生产量在100立方米左右。

当时，木匠商铺及家具制造厂主要为附近学校和相关机构生产木制家具及栅栏等。自1947年起，生产能力大幅提高，经营范围拓宽，开始生产椅凳，木器及木制缝纫架。1959年1月1日，公司更名为：宝林纳木业工厂。

1999年6月1日，波美拉尼亚西部地区决定将宝林纳地区的国有工厂私有化。充足的资金支持和投入，现代化技术的不断引进，才让宝林纳地板的生产实现量的飞跃。宝林纳三层实木复合地板的良好声誉走出波兰，传至全球。

Stable construction
结构稳定

The thickness of each layer of the Barlinek flooring is not accidental. It is the result of many years of experience, hundreds of hours of research and tests of the natural wood properties. Our expert knowledge has enabled us to develop a floor with an ideal construction to reduce the natural tensions of the material.

结构稳定
地板各层木料的厚度都是研究室对木材特性经过多年、数千个小时的严格试验得出的结果。专业的知识技能使我们能研发出理想的地板结构，能有效限制天然原木的自然伸缩运动。

Underfloor heating
地板采暖

Not every wooden floor is suitable for underfloor heating. Thanks to its layered structure, the Barlinek flooring perfectly conducts heat and can be successfully applied on both electric and water underfloor heating.

支持地暖铺设
不是所有的实木地板都适用于地热环境。多层的地板结构使得宝林纳地板具备良好的导热性能，不仅适用于电力加热系统还适合水暖地热的铺设。

Resistant to humidity changes
有效抵抗湿度的变化

Tame the forces of nature

The cross construction of the Barlinek flooring is resistant to the changes in the air humidity. There is no need to worry about your floor even in rainy days, when the air becomes very humid, or during the winter - when the air is dried by heating.

克服自然力

宝林纳地板的交叉结构能有效应对空气湿度的变化，因此，即使在阴雨连绵空气湿度过高，或是在寒冬，空气被加热干燥的时候，您也无需担心自己的地板。

External factors - temperature and moisture may affect the appearance of real wood. Therefore, our floor is carefully protected with a lacquer or oil finish. Also, the cross construction of the flooring protects it against squeaking, swelling and drying out.*

外部因素- 温度和湿度的变化会对实木地板的外观产生一定影响。为了在一定程度上缩小外部因素对地板的影响，宝林纳地板的表面大都采用清漆和天然油涂层。除此之外，交叉结构的地板能在一定程度上避免地板产生吱吱声，发生膨胀或干硬的现象。
